

ROSS ISR PROJECT HYDROLOGIC MONITORING

Client:

Strata Energy

SERVICES PROVIDED

- Construction Engineering
- Drilling Assistance
- Field Investigations
- Hydrologic Studies/Calculations
- Computer Modeling
- Geologic Investigations
- Mapping
- Surface/Groundwater Sampling and Monitoring
- Design
- Groundwater Investigations
- Permitting

Markets

- Energy

THE PROJECT

WWC Engineering provided hydrologic monitoring services to Strata Energy including monitoring well siting, installation and monitoring (quarterly). WWC developed monitoring plans for private wells within and up to 3 miles from the Project.

Highlights

- Developed and implemented programs in collaboration with Wyoming Department of Environmental Quality.
- Data (both quality and quantity) reviewed and accepted by multiple Federal (EPA, NRC, BLM) and State (WDEQ/LQD, WQD) agencies.
- Continued monitoring for compliance purposes following baseline monitoring to satisfy State and Federal licenses.
